Subject: RE: pricing

Lawrence

As promised, your testimonial:

I have been using "Refrigeration Direct" for years now within my previous employment and in my current, I strongly recommended them when I moved companies.

I have had direct and quick response from a management level in all my queries and they have always been happy to help and support me with advice on all different aspects. Covering equipment repairs, replacement, servicing, and aiding me in the right selection of items to suit our business and within our budget. I have also always received professional and sound advice from the engineers.

I previously had numerous problems with our last service contractors, "a very large company." Now I get a fast response and have a much better relationship with this smaller but more efficient company. This is important as it gives me peace of mind, especially when looking after many sites.

I am always happy to recommend them.

Thank you,
Tina Moxley
